TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of technology
2. University Department/Centre	Department of computer sciences
3. Programme Title	Network Management
4. Title of Final Award	B.SC. in computer sciences
5. Modes of Attendance offered	courses
6. Accreditation	ABET
7. Other external influences	no
8. Date of production/revision of this specification	9-6-2021
9. Aims of the Programme	

Within the tremendous development of computer networks and in response to the society's need for communications, the need for this branch arose. The graduates of the branch work in the field of programming applications for networks and the Internet, designing and programming websites, in addition to learning the basics of designing and connecting networks. He also possesses expertise in the field of safe data transfer through networks with both types of networks. wired and wireless communication

10. Learning Outcomes, Teaching, Learning and Assessment Methods

A. Knowledge and understanding

A1- Knowledge and understanding to demonstrate basic facts, concepts, principles and theories related to information technology.

A2- Learn computer networking protocols

A3 - Familiarity with the advanced operating system, mobile identification and distributed computing system.

B. Subject-specific skills

B 1 - Teamwork and the acquisition of administrative personality and social skills.

B 2 - Writing programs that deal with computer networks and programming sites

B3 - Writing protection programs for computer networks

Teaching and Learning Methods

Theoretical books

science laboratories

small projects

Electronic references

Assessment methods
<ol style="list-style-type: none"> 1. Quarterly exams 2. Sudden daily tests 3. Classroom posts and discussions 4. Homework 5. Making small projects
C. Thinking Skills C1- Questioning: Searching for new information by creating and raising questions. C2 - Conclusion: Thinking beyond the available information to fill the gaps in it. C 3- Comparing: Noting the similarities and differences between two or more things. C4- Classification: Putting things into groups according to common characteristics.
Teaching and Learning Methods
<ol style="list-style-type: none"> 1. theoretical lectures 2. Practical lectures (laboratory) 3. Specialized workshops
Assessment methods
Theoretical and practical tests Reports on computer networks and website languages small projects
D- General and transferable skills (or) other skills related to employability and personal development D 1- The student has the ability to design and implement small projects

D 2- The student has the ability to work in a team
D 3- The student has the ability to establish and manage networks
D4 - The student has the ability to deal with computer networks and design websites while maintaining the security of networks

Learning Methods

1. Theoretical lectures in class
2. Practical lectures in the laboratory
3. Adoption of electronic data show and Power point means
4. Adoption of modern books that are appropriate for the stage

Assessment methods

1. Quarterly exams
2. Sudden daily tests
3. Classroom posts and discussions
4. Homework
5. Making small projects

13. Personal Development Planning

Training courses - Workshops - Research and street - Specialized seminars -
Conferences - Graduate studies
See the most important Arab and foreign sources
Study case studies and generalize the results
Solve self-test questions in sources and references
Simulation of complex systems

14. Admission criteria.
Central Admission
15. Key sources of information about the programme
<ol style="list-style-type: none">1. Labor market requirements2. Keeping pace with scientific development
